OVERVIEW

APPRAISAL MANUAL IN GENERAL

This appraisal manual is a general guide to basic grouping and classing of properties as they apply to the cost approach. It can be used in conjunction with the sales approach by using other adjustments such as the market factors. It can also be used in the income approach as a basis for basic grouping which can be further delineated with Income classing & grouping.

CLASS OF CONSTRUCTION

The classifications are based on quality of materials and workmanship. The classifications and cost manual are based on Denton County and the typical specifications for construction in this area and climate.

The specifications stated for each class allow for variations of materials, not only between classifications, but within each class. The proper materials should be selected within each class of construction. A building may have materials which fit into several classifications, but the quality of the materials and the workmanship will determine the proper class. Special care must be taken to select the proper class and then to select the proper materials in that class. Some classes overlap between residential & commercial categories due to construction style or type.

DEPRECIATION

Physical depreciation is the general wear of the structure. Use the depreciation tables provided for physical depreciation.

SCHEDULE INTERPOLATION

Select schedules incorporate an Interpolation option. Interpolation makes the value change between ranges occur gradually.

COST AND LOCAL MULTIPLIERS

Cost and local multipliers are used to adjust costs by location. Generally, these types of multipliers apply to all primary improvement schedules.

RESIDENTIAL

BASIC CATEGORY GROUPINGS

Residential housing is broadly categorized into 6 quality categories. Each category is further delineated into their predominant exterior and number of stories.

Quality Category

- Low
- Fair
- Average
- Good
- Very Good
- Excellent

Exterior Type

- Brick
- Log
- Metal
- Stone
- Stucco
- Vinyl
- Wood

Stories

- Single
- Multiple

QUALITY DESCRIPTIONS & CLASSES

(In electronic format, this is the quality description hyperlink [Quality](#))

LOW

Low structures will be of low construction quality and materials. These structures will meet the minimum standards for local building codes. All architecture will be designed for functionality, with little or no attention given to appearance. The exterior finish will be plain, with little to no trim. Windows and doors will be of low cost grade to meet minimum building standards.

The interior will meet the minimum requirements for local building codes. All fixtures will be of low cost quality and minimal in quantity. Very little or no attention will be given to detail for interior finish. Flooring will be low cost, and will meet the minimum building code requirements.

Class Code	Quality	Exterior	Story

LW2	Low	Wood	Multiple Story

FAIR

Fair structures will be of inexpensive construction quality designed and built typically for mass production. These structures are best described as a basic tract home. Most structures will be built from a standardized set of plans with few options. Architecture will usually be standardized to allow for the use of mass produced, inexpensive materials. Windows and doors will be inexpensive with little trim. Exterior trim and ornamentation will be limited to the front of the structure. The overall quality of workmanship is below average, but not below building code standards.

The interior will be finished with inexpensive grade materials. Fixtures will be inexpensive and sufficient in quantity for the application. Flooring will be of inexpensive, mass produced quality. Interior trim will be minimal.

AVERAGE

Average structures will be of average quality construction and materials. Most structures will be built as standardized plans with minimal options, but could have additional refinements to the interior and exterior. Doors and windows will be of average quality, mostly stock & widely available materials. The overall quality of construction will be average. Exterior trim will have sufficient ornamentation, average quality masonry design, and average quality fenestration.

The interior will be of average quality, using standard grade materials and workmanship. Flooring will be of average stock quality. Fixtures will be of average quality and quantity. Some rooms of the structure may receive slight levels of enhancement with trim for appearance.

GOOD

Good structures will be of good quality construction and materials. Most structures will be built as standard plans, and may be built with mass production construction techniques and methods. Structures will have individual variances in the ornamentation and finish of the exterior. Roofing materials will be of a moderately good quality weight and appearance. Structures will generally exceed building code standards and requirements of lending institutions. The structure is best described as a good quality tract home with individually selected standardized variations.

The interior of a Class 4 structure will generally be of above average quality. Interiors are well finished with above average level of attention given to interior refinements and detail. Flooring will be of good quality materials. An ample amount of cabinets in the kitchen area of good quality. Overall interior finish and craftsmanship is of average to above average, and good quality.

VERY GOOD

Very Good structures are of very good quality construction and materials. These structures will frequently have individual attention to detail. Some structures will be designed from tract type construction plans that may have multiple options and variations. Roofing material will be of good to high quality materials. This class is best described as a high quality tract home, or individually designed structure with individual options and ornamentation. The exterior will have more attention to detail, and will have different levels of ornamentation and fenestration.

The interior will be above average to high quality throughout. Flooring will be of high grade materials. Interior ceiling height could likely be greater than 8', with vaulted, stepped or cathedral ceilings in some areas such as master bedrooms and main living areas. Hardware will be above average to high quality. Crown molding or additional trim is likely to be present in main living areas, kitchens, and master bedroom areas. Fixtures will be more than adequate, well placed, and above average to high quality. Kitchens will have high quality cabinets with high quality hardware. Kitchens may include items such as island counters, etc. Overall interior finish and craftsmanship is of high quality.

EXCELLENT

Excellent structures are of the finest quality construction and materials, and are characterized by the very best quality workmanship throughout the entire structure. These structures will be individually designed with the finest level of attention to detail. The structure is best described as an extensively appointed, exceptionally high quality luxury home with completely custom designed features. These structures will generally require extensive engineering costs due to the complexity of the design and the environmental control systems required. The exterior will have substantial levels of detail and fenestration. Doors and windows will be custom designed and of the very best quality. Roof design will have exceptional quality materials and will have substantial levels of detail and ornamentation.

The interiors have additional levels of luxury materials, fixtures, and craftsmanship. Flooring will be of premium luxury grade, or exotic type hardwoods, tile, or other material that is finished to a very high level, and are rated for high sustainability. Flooring will frequently have custom inlaid materials, unique designs, patterns or artwork. Extensive levels of trim, moldings, and textures applied to ceilings and walls. Residences will often have plaster walls and ceilings creating a highly refined look. Trim/molding may include hand-fabricated custom materials, and may be finished with high levels of detail. Interior layouts will include elaborate special-purpose rooms such as libraries, theaters, reception areas, hidden rooms, etc. Some residences may have additional master suites or an elaborate guest suite. Master bedrooms will be extensively appointed with the finest materials. Some structures may have additional kitchens or kitchenette areas for convenience. Overall, the interior is of the very best quality luxury materials and workmanship with elaborate levels of detail and refinement.

PERCENTAGE BREAKDOWN OF BASE COSTS

The following percentages indicate approximate portions of the total cost of average-quality wood frame houses attributable to each component listed. (for reference only)

<u>AVERAGE-QUALITY HOUSE</u>	
Plans	0.6%
Plan check and permit	2.1%
Survey	0.4%
Water meter and temporary facility	0.6%
Excavation, forms, concrete, and backfill	5.7%
Lumber, rough	8.0%
Carpenter labor, rough	9.6%
Roofing	4.0%
Insulation and weather-strip	1.3%
Exterior Finish: siding, stucco, masonry veneer	5.5%
Interior Finish: plaster and drywall	6.3%
Sash, doors and shutters	4.1%
Lumber, finish	2.4%
Carpenter labor, finish	3.0%
Hardware, rough	0.4%
Hardware, finish	0.5%
Cabinets	4.0%
Countertops/tile	2.2%
Floor Covering: hardwood and carpeting	2.8%
resilient	1.0%
Plumbing	6.4%
Shower doors/mirrors/tub enclosure	0.5%
Electrical	4.8%
Light fixtures	1.2%
Built-in appliances	1.9%
Heating	3.9%
Sheet metal	0.4%
Ornamental iron	0.4%
Painting	2.6%
Sewer connection	0.6%
Miscellaneous	0.9%
Cleanup	0.8%
General contractor's overhead and profit	11.1%
TOTAL	100%

The 11.1 percent listed for general contractor's overhead and profit is the percentage of the total cost. This is the equivalent of 14.8 percent of the labor, material, and subcontract cost, excluding cost of plans, survey, plan check, and permit, with a range from 10.2% to 20.8%.

*** Data taken from Marshall & Swift Residential Cost Handbook (p. D-8)

TOWNHOME

BASIC CATEGORY GROUPINGS

Town homes are broadly categorized into 6 quality categories. Each category is further delineated into their predominant exterior and number of stories.

Quality Category

Class

- 26
- 26A
- 26B

QUALITY DESCRIPTIONS & CLASSES

CLASS 26

CONDOMINIUMS / TOWNHOMES

SPECIFICATIONS

CONSTRUCTION:	Good quality, exhibits refinements and good workmanship throughout the entire structure.
FOUNDATION:	Concrete slab - Pier, good quality structure.
FLOORING:	Good quality structure - Good quality carpet, tile, linoleum.
EXTERIOR:	Brick Veneer or high quality Hardy Board - Very good fenestration - May have some custom ornamentation. May have some stone ornamentation.
INTERIOR:	Drywall high quality finished - High quality wallpaper or hardwood paneling - kitchens, baths, closets, spacious, high quality materials and workmanship - Doors, hardware, moldings, paint, high quality, custom workmanship.
ROOF:	Good quality Composition shingles.
HEATING:	Central air conditioning.
FIREPLACE:	High quality.
ELECTRICAL:	Ample well placed outlets - Good quality fixtures.
PLUMBING:	Quality Features – Ample number of fixtures
BUILT IN:	Ample well placed built-ins.

CLASS 26A

CONDOMINIUMS / TOWNHOMES

SPECIFICATIONS

CONSTRUCTION:	Very good quality, exhibits refinements and very good workmanship throughout the entire structure.
FOUNDATION:	Concrete slab - Pier, good quality structure.
FLOORING:	Very good quality structure – Very good quality carpet, hardwood, tile, linoleum.
EXTERIOR:	Brick Veneer, high quality Hardy Board, could have some stone or stucco Very good fenestration. May have some custom ornamentation.
INTERIOR:	Drywall very good quality finished – High or very good quality painting Kitchens, baths, closets, spacious, high quality materials and workmanship Doors, hardware, moldings, paint, high quality, very good workmanship.
ROOF:	Good to high quality Composition shingles.
HEATING:	Central air conditioning.
FIREPLACE:	High quality.
ELECTRICAL:	Ample well placed outlets - Good quality fixtures.
PLUMBING:	Quality Features – Ample number of fixtures
BUILT IN:	Ample well placed built-ins.

SPECIFICATIONS

CONSTRUCTION:	Very good to excellent quality, exhibits refinements and very Good to excellent workmanship throughout the entire structure.
FOUNDATION:	Concrete slab - Pier, good quality structure.
FLOORING:	Very good quality structure – Very good quality carpet, hardwood, tile.
EXTERIOR:	Brick Veneer, high quality Hardy Board, could have some stone or stucco Very good fenestration. Custom ornamentation
INTERIOR:	Drywall very good quality finished – High or very good quality painting
Painting-	kitchens, baths, closets, spacious, high quality materials and workmanship Doors, hardware, moldings, paint, high quality, very good workmanship.
ROOF:	Good to high quality Composition shingles.
HEATING:	Central air conditioning.
FIREPLACE:	High quality.
ELECTRICAL:	Ample well placed outlets - Good quality fixtures.
PLUMBING:	Quality Features – Ample number of fixtures
BUILT IN:	Ample well placed built-ins.

CLASS SPECIAL PRICE (SPEC)

Use of Special Price Class should be limited to properties that exceed base cost by the addition of extensive amounts of fixtures, accessories, and other special features that are not covered in the basic cost calculations for that class.

PERCENTAGE BREAKDOWN OF BASE COSTS

The following percentages indicate approximate portions of the total cost of average-quality wood frame houses attributable to each component listed. (for reference only)

AVERAGE-QUALITY HOUSE

Plans	0.6%
Plan check and permit	2.1%
Survey	0.4%
Water meter and temporary facility	0.6%
Excavation, forms, concrete, and backfill	5.7%
Lumber, rough	8.0%
Carpenter labor, rough	9.6%
Roofing	4.0%
Insulation and weather-strip	1.3%
Exterior Finish: siding, stucco, masonry veneer	5.5%
Interior Finish: plaster and drywall	6.3%
Sash, doors and shutters	4.1%
Lumber, finish	2.4%
Carpenter labor, finish	3.0%
Hardware, rough	0.4%
Hardware, finish	0.5%
Cabinets	4.0%
Countertops/tile	2.2%
Floor Covering: hardwood and carpeting	2.8%
resilient	1.0%
Plumbing	6.4%
Shower doors/mirrors/tub enclosure	0.5%
Electrical	4.8%
Light fixtures	1.2%
Built-in appliances	1.9%
Heating	3.9%
Sheet metal	0.4%
Ornamental iron	0.4%
Painting	2.6%
Sewer connection	0.6%
Miscellaneous	0.9%
Cleanup	0.8%
General contractor's overhead and profit	11.1%
TOTAL	100%

The 11.1 percent listed for general contractor's overhead and profit is the percentage of the total cost. This is the equivalent of 14.8 percent of the labor, material, and subcontract cost, excluding cost of plans, survey, plan check, and permit, with a range from 10.2% to 20.8%.

*** Data taken from Marshall & Swift Residential Cost Handbook (p. D-8)

MANUFACTURED HOUSING

BASIC CATEGORY GROUPINGS

Manufactured housing is broken up into 2 broad categories, single wide and double wide. Each grouping is further delineated by quality.

Quality Category

- Low
- Fair
- Average
- Good
- Very Good
- Excellent

QUALITY DESCRIPTIONS & CLASSES

Manufactured Housing Classing and Descriptions

MS1 & MD1

This class of manufactured home would be considered low quality. Low quality manufactured houses are designed to meet minimum code requirements, in which the overall quality of material and workmanship is below average. Floor plans are usually simple, and have little to no attention given to detail. Typical standard wall height is included.

MS2 & MD2

This class of manufactured home is considered fair quality. Fair quality manufactured houses are designed to meet standard code requirements, in which the overall quality of materials and workmanship are average. They tend to be relatively plain in finish and appearance with a simple floor plan. The plumbing is typically on a single outside wall. Typical standard wall height is included.

MS3 & MD3

This class of manufactured home is considered average quality. Average quality manufactured houses will meet or exceed code requirements. The overall quality of materials and workmanship is average and of standard grade with a front elevation that may have some ornamentation. Typical standard wall height is included.

MS4 & MD4

This class of manufactured home is considered good quality. Good quality manufactured houses will generally exceed the minimum code requirements. Exterior design and interior finishes will include some detail and ornamentation. The connection seams may be somewhat apparent on multisectional houses. Typical standard wall height is included.

MS5 & MD5

This class of manufactured home is considered very good quality. Very good quality manufactured houses are typically found in high quality manufactured housing parks. Exterior finishes and interior details will resemble those of site built housing and exceed minimum code requirements. Typical standard wall height is included.

MS6 & MD6

This class of manufactured home is considered excellent quality. Excellent quality manufactured houses may be similar in both design and appearance to modular constructed houses. This class may even be built to the extent of site built residences typically found in tract developments. Costs for these types of construction will overlap. Manufactured houses at this quality level will exceed minimum code requirements and will often meet local building codes. Typical standard wall height is included.

OTHER IMPROVEMENTS

(Pools, Spas, Barns, Stables, Arenas, Tennis Courts, Greenhouse, Storage)

BASIC CATEGORY GROUPINGS

This section contains other improvements such as pools, barns, arenas, tennis courts, hangers, spas, and greenhouses.

QUALITY DESCRIPTIONS & CLASSES

CLASS 1070 RESIDENTIAL GREENHOUSE

SPECIFICATIONS

CONSTRUCTION:	Wood or Aluminum Frame.
FOUNDATION:	Dirt.
EXTERIOR:	Fiberglass - Poly-Cover.
INTERIOR:	Dirt Floor - Water - Vents.

CLASS 1600, 1610, 1620, 1630 BARNs

CLASS 1600	Low Cost Light pole frame, metal or wood siding Unfinished, dirt floor Minimum or no electrical service
CLASS 1610	Average Cost Pole frame, metal or wood siding Unfinished walls, cheap asphalt or slab floor Minimum to adequate electrical service
CLASS 1620	Low Cost Light steel frame, metal or wood siding Unfinished, dirt floor Minimum or no electrical service
CLASS 1630	Average Cost Steel frame and truss, metal or wood siding Unfinished walls, cheap asphalt or slab floor Minimum to adequate electrical service

CLASS 1650, 1660, 1670 OUTBUILDING/STORAGE

CLASS 1650

LOW COST

CONSTRUCTION:	Low cost - Wood Frame.
FOUNDATION:	On skids.
EXTERIOR:	Wood - Metal.
INTERIOR:	Unfinished.
FLOORING:	Wood Floor.
ROOFING:	Slant-Roof - Roll Roofing.

CLASS 1660

AVERAGE QUALITY

CONSTRUCTION:	Wood Frame.
FOUNDATION:	Concrete Slab.
EXTERIOR:	Wood - Metal - Stucco.
INTERIOR:	Unfinished.
ROOFING:	Gable - Slant-Roof - Composition Shingle - Metal

CLASS 1670

GOOD QUALITY

CONSTRUCTION:	Wood Frame.
FOUNDATION:	Concrete Slab.
EXTERIOR:	Wood - Metal.
INTERIOR:	Semi-finished.
ROOFING:	Gable - Composition shingle.

CLASS 1680 STABLES

CLASS 1680

CONSTRUCTION:

Concrete

EXTERIOR:

INTERIOR:

or

PLUMBING:

ELECTRICAL:

AVERAGE SPECIFICATIONS

Light gauge steel - Angle Iron - Steel Pipe -Lightweight wood frame.
Foundation.

Aluminum - Steel - Cl.

Unfinished - Wood partitions for stables - Sawdust or Dirt Floors - Concrete
Asphalt walk-ways.

Minimum.

None or minimum fixtures.

NOTES: Little or no ornamentation. Show arena with little or no seating or no arena.

CLASS 1680G

CONSTRUCTION:

Foundation.

EXTERIOR:

INTERIOR:

walk-ways.

PLUMBING:

ELECTRICAL:

GOOD SPECIFICATIONS

Light gauge steel - Angle iron - Steel pipe -Wood frame. Concrete

Aluminum - Steel - Concrete block- Stucco.

Unfinished - Blow-in insulation - Batt insulation with chicken wire -

Wood partitions for stables - Sawdust or Dirt Floor - Concrete or Asphalt

Average fixtures with or without shower stalls.

Average fixtures.

NOTES: Some ornamentation. May or may not have office. Show arena with little or no seating or no arena.

CLASS 1680B

CONSTRUCTION:

EXTERIOR:

INTERIOR:

or

PLUMBING:

ELECTRICAL:

BEST SPECIFICATIONS

Heavy gauge steel (I-Beams with bar joists) or comparable steel or wood
construction. Concrete Foundation.

Aluminum - Steel - Stucco - Concrete block - Wood.

Insulated, with partial to full finish, wood or masonry partitions for stables, dirt
sawdust floors, concrete walk-ways.

Good to excellent fixtures, shower stalls, office with two or more fixtures.

Good to excellent fixtures, many outlets.

NOTES: Good ornamentation. Show arena with adequate seating. Good to excellent quality materials and workmanship.

CLASS 1680E

CONSTRUCTION:

EXTERIOR:

INTERIOR:

floors,

tack

PLUMBING AND

ELECTRICAL:

EXCELLENT SPECIFICATIONS

Heavy gauge steel (I-Beams with bar joists) or comparable steel or wood
construction. Concrete Foundation.

Face brick or stone veneer, heavy roof, custom dormers, arches.

Aluminum, steel, stucco, concrete, block or wood.

Insulated fine finished, custom stalls, best wood available. Dirt or sawdust
concrete walk-ways. High quality finishes out of office areas, waiting room,
rooms, breeding areas.

High quality fixtures and hardware throughout.

Excellent lighting and showers and dressing room.

NOTES: High quality ornamentation. Excellent quality materials and workmanship. Above adequate show arena and viewing areas.

CLASS 1740 RESIDENTIAL TENNIS COURTS

1740RN	No Contributory Value
1740RB	Basic (court only)
1740RA	Average (court & fence)
1740RG	Good (court, fence, lights)
1740RE	Excellent (court, fence, lights)

Note: Tennis Court classes 1740A, 1740B, & 1740E will be used for commercial use only.

CLASS 1770 ARENAS (Metal Frame and Walls)

LOW	Steel siding, some wainscot Minimum facility, some flooring Minimum services No HVAC
AVERAGE	Good metal panels and roof, some interior finish Unfinished arena area, floors in feed/tack and washrooms Adequate lighting and water service No HVAC
GOOD	Good siding or stucco on wood or steel frame, small entrance Finished stalls, good floors, feed/tack room, good quality throughout Good lighting and water outlets, restrooms No HVAC
EXCELLENT	Glulam (glued laminated timber) or steel frame, good veneer, siding, good entrance Finished stalls, lounge, viewing area, quality finishes High – level electrical service, good restrooms and kitchen No HVAC

CLASS 1771 ARENAS (Masonry Bearing Walls)

Specifications:

LOW	Concrete block, some wainscot Minimum facility, some flooring Minimum services No HVAC
AVERAGE	Block or tilt-up, very plain, some interior finish Unfinished arena area, floors in feed/tack and washrooms Adequate lighting and water service No HVAC
GOOD	Steel or wood frame, block or tilt-up, small entrance Finished stalls, good floors, feed/tack room, good quality throughout Good lighting and water outlets, restrooms No HVAC
EXCELLENT	Steel frame, good block or concrete panels, good entrance Finished stalls, lounge, viewing area, quality finishes High - level electrical service, good restrooms and kitchen No HVAC
